CAREER OBJECTIVE :

I'm deeply passionate about web design, where creativity meets functionality. Crafting visually appealing and user-friendly websites is not just my job; it's my calling. With each project, I aim to create digital experiences that leave a lasting impact.

SKILLS :

Expert : Bootstrap, Tailwind, Javascript, ES6, React js, Firebase, Mongoddb

Comfortable : Next js , Nodejs, Express js, Ant Design

Familiar With : JWT, Material UI, Redux Toolkit

Soft Skills : Communication, Adaptability , Time Management , Collaboration , Leadership

PROJECTS :

Team project :

1. Title : TRIPSURE (Worked as a Team Leader and Front-end Developer) [Live Site](#) [Client](#) [Server](#)
Plan your perfect trip with our travel website. Explore destinations, book adventures, and turn your travel dreams into reality.

- Easily search for destinations, select travel dates, and choose the number of people in your group to plan your adventure.
- Enjoy features like weather information, secure authentication, a customizable AI chatbot , a messenger chat box, places by category and top visited destinations.
- Safely book packages and offers with SSL Commerce and Stripe payment integration, while admins have full control through a dedicated dashboard.

Tools : React, Node, Mongoddb, Firebase, Tailwind, Ant Design, Daisy ui, Redux toolkit, Stripe.

Personal project :

2. Title : MUSICITS [Live Site](#) [Client](#) [Server](#)

Unlock your musical potential with Virtuoso Academy. Learn to play your favorite instruments online, guided by world-class instructors.

- Firebase Authentication to handle user access, while a versatile dashboard caters to three user types - students, instructors, and admins
- Student can Easily book classes and pay using Stripe for a smooth user experience and identify the best class teachers based on the highest number of student submission.
- Provided instructors the ability to post their classes, all manageable by the admin through the dashboard and admin can monitor anyone from the dashboard.

Tools : React js, Node js, Mongoddb, Firebase, Tailwindcss, Daisy Ui, Stripe

3. Title : KAWAII KORNER [Live Site](#) [Client](#) [Server](#)

Discover a world of wonder at our toy website, where imagination comes to life. Find a treasure trove of toys that spark joy and creativity for kids of all ages.

- Users are required to log in to add their toys to the website,
- Users have complete control over their toy listings, ensuring a seamless and interactive experience for updating, and deleting their toys on the platform.
- The website provides a user-friendly categorization system for finding toys by category

Tools : React js, Node js, Mongoddb, Firebase, Tailwindcss, Daisy Ui

ACHIEVEMENT: [Letter](#)

I served as a team leader at Programming Hero's Shadow Intern program, where I empowered my team members to take ownership of their tasks, fostering a motivated work environment and enabling us to surpass project objectives.
